## **A UK-wide survey of people with diagnosed HIV**

### **England Strategic Health Authorities of residence data report** (n=1608, March 2009)

This report uses data from the UK *What do you need?* survey 2007-08, conducted by Sigma Research in collaboration with 110 charitable AIDS Service organisations and HIV out-patient clinics, care agencies and health promoters throughout the UK. It supplements the main survey report which is available at: [www.sigmaresearch.org.uk/go.php/reports/report2009b/](http://www.sigmaresearch.org.uk/go.php/reports/report2009b/)  
Survey methods and interpretation of the variables are outlined in that report.

This data is intended to provide HIV service planners with information about their local population of people with diagnosed HIV. The report contains data from people who live in England and for whom Strategic Health Authority (SHA) of residence is known. Respondents are grouped according to the SHA in which they live.

There are also whole country reports for Wales and Scotland, with people grouped according to their region of residence. There are also individual data reports for each SHA in England which had 20 or more responses from one or more of their PCTs, with people grouped according to their PCT of residence. All these reports are available at: [www.sigmaresearch.org.uk/go.php/local/hiv/wdy08](http://www.sigmaresearch.org.uk/go.php/local/hiv/wdy08)

#### ***The data***

The survey used two data collection methods over seven months from 5<sup>th</sup> June 2007 until 5<sup>th</sup> January 2008: a self-sealing, Freepost addressed booklet distributed by clinics and AIDS service organisations; and via a specific website promoted via links on AIDS service organisation websites. The web version was made available in both English and French.

This report contains data from all the people recruited through both methods. To be included in the sample respondents had to: be aged 16 or over; be living in the UK; have diagnosed HIV infection. Differences between the number of surveys returned and the number of people who appear in the sample are due to these exclusions.

#### ***The tables***

Groups of people living in the same Strategic Health Authority appear as a row (horizontal line) in the tables. The bottom row of each table gives the result for all people living in England. The first table shows the number of people recruited to the survey living in the ten SHAs and the size of the sub-samples in the rest of the tables. The tables show the proportions (%) of each sub-sample for that variable (less missing data). Rows add up to 100%. The only exception to this layout is table 4, Age averages.

#### ***Questionnaires***

The contents page identifies the Booklet question number (Q) each table is derived from. The questionnaire used in the survey is available to download at: [www.sigmaresearch.org.uk/files/VS2007booklet.pdf](http://www.sigmaresearch.org.uk/files/VS2007booklet.pdf)

#### ***Funding***

The survey was funded by Terrence Higgins Trust and the Department of Health. Recruitment occurred in England, Wales, Scotland and Northern Ireland.
